

REHAN RASHID

Data Engineer | Analytics & BI Specialist

Dubai, UAE +971502801914 rehanrashidd1@gmail.com [LinkedIn](#) | [Portfolio](#) | [GitHub](#) Resident Visa (own visa)

SUMMARY

Data engineer and analytics professional with hands-on experience building ETL pipelines, interactive dashboards, and automated reporting systems for media, marketing, and real estate domains. I turn raw campaign and audience data into actionable business insights — engineering end-to-end data workflows from API ingestion to BI visualization. My stack spans Python, SQL, Power BI, Tableau, Snowflake, Databricks, and modern orchestration tools like n8n. I've built predictive models, automated KPI tracking (CPA, ROAS, ROI), and integrated LLM-powered applications. I write clean, performant code while owning data architecture and delivery — equally comfortable in a data warehouse, a Python script, or a stakeholder presentation.

TECHNICAL SKILLS

Languages

Python · SQL · R · TypeScript · JavaScript · DAX

Analytics & BI

Power BI (DAX · Dashboards) · Tableau · Excel (Pivot Tables · VLOOKUP) · Jupyter Notebook · VS Code

Machine Learning & AI

Scikit-learn · TensorFlow · Predictive Modeling · Random Forest · LLM Integration · AI Agents · Flask APIs · REST APIs

Web & Application

Next.js · Flutter · React · Supabase · Stripe · n8n automation

Data & ETL

ETL Pipelines · Data Warehousing · Star Schema · Dimensional Modeling · SSIS · Snowflake · Databricks · Databricks Unity Catalog

Media & Marketing Analytics

Campaign Performance Tracking · ROAS Analysis · Conversion Funnels · Audience Segmentation · Channel Attribution · KPI Automation (CPA · ROAS · ROI)

Databases & Tools

SQL Server · PostgreSQL · MongoDB · Google Analytics · Git/GitHub · n8n · Snowflake · Databricks · API Integration

Cloud & DevOps

AWS (EC2/S3/RDS) · Azure · CI/CD · Jenkins · GitHub Actions · Docker · SonarQube

CRMs & ERPs Deployed

Salesforce, ZOHO, Odoo, Property Base.

EXPERIENCE

Data Engineer Intern

AUG 2024 – SEP 2024

Artelligent Investments, Dubai

- Designed **SQL-based reporting datasets** to support investment and portfolio performance analysis.
- Built interactive **analytics dashboards** for monitoring cryptocurrency market trends and investment performance.
- Developed **Python ETL pipelines** to automate **data extraction, transformation, and reporting**.
- Integrated multiple **APIs to automate financial data collection and reporting**.
- Performed data validation and quality checks ensuring reporting accuracy.
- Collaborated with **stakeholders** to deliver business reports supporting investment decisions.

Software Engineer Intern

JUN 2023 – SEP 2023

Marea Capital Properties, Dubai

- Designed and implemented an **omnichannel lead integration pipeline** that collected leads from multiple marketing sources, including Meta Ads, Google Ads, landing pages, and web forms into a centralized processing workflow.
- Developed **Python-based scheduled ETL jobs** to automate lead ingestion, validation, deduplication, and transformation, significantly reducing manual processing.
- Built a **lead qualification engine** using configurable business rules to filter invalid, duplicate, and low-quality leads before routing them to sales teams.
- Integrated the qualified leads with an **automated outbound calling system**, enabling instant lead assignment and improving response time for sales representatives.
- Automated synchronization of lead status, call outcomes, and customer interactions back into the CRM, ensuring real-time data consistency across systems.
- Implemented automated **WhatsApp and SMS notification workflows** to update customers based on agent activities and CRM status changes.
- Developed SQL queries and reporting datasets to monitor lead funnel performance, conversion rates, agent productivity, and campaign effectiveness.
- Collaborated with business stakeholders to automate reporting processes and improve visibility into marketing and sales KPIs through interactive dashboards.

PROJECTS

MediBot: Health AI Assistant | Final Year Project

- Developed an AI-powered healthcare application with ML-based disease prediction and LLM chatbot integration.
- Built REST APIs using Flask for real-time predictions with 90%+ model accuracy.
- Designed cross-platform Flutter application with secure authentication and database integration.

Kingmeat.ae: Premium E-commerce Platform

- Developed high-performance full-stack e-commerce platform using Next.js, TypeScript, and Supabase for a premium UAE-based butcher shop.
- Integrated Slider Dispatch API for automated order fulfillment with real-time GPS-based fare calculation.
- Engineered secure checkout with Stripe (Apple/Google Pay) and automated notification system via n8n + Telegram Webhooks.

Real Estate Market Insights

- Scraped and analyzed 5,000+ property listings from RealProperty.pk using Python (BeautifulSoup, Requests) to evaluate price trends across Islamabad and Rawalpindi.
- Engineered ETL pipeline for data cleaning, price normalization (Crore → PKR), and transformation using Pandas and Power Query.
- Developed interactive Power BI dashboard with KPIs (Avg: 61.8M PKR, Min, Max), price segmentation, and city/area filters for market intelligence.

Marketing Performance Analytics

- Developed interactive Databricks analytics dashboard tracking marketing ROI, revenue, and conversions across 6+ channels using SQL and Unity Catalog.
- Designed 12 Lakeview visualizations including conversion funnel analysis, ROAS by channel, and monthly revenue trends.
- Engineered automated KPI tracking for CPA, ROAS, and channel-wise performance enabling real-time campaign optimization.

Revenue Modeling for SaaS Startups

- Developed revenue prediction pipeline using Python (Pandas, NumPy, Scikit-learn) with Random Forest Regressor to forecast SaaS startup revenue.
- Conducted advanced EDA using Matplotlib and Seaborn analyzing revenue distribution, business models, and founder behavior across 5,000+ AI/SaaS startups.
- Uncovered key insights: subscription models dominate (60%+), AI is the most common vertical, solo founders represent 40%+ of the market.

Netflix Movies & TV Shows Data Analysis & Popularity Prediction

- Performed EDA on Netflix catalog using Python (Pandas, NumPy, Matplotlib, Seaborn) analyzing genre distribution, content trends, and highest-rated titles.
- Built Random Forest Regressor to predict popularity scores based on genre, release year, and vote average.
- Identified key insights: Action/Drama dominate top genres; content volume peaked in recent years.

EDUCATION

B.Sc. Software Engineering (4 years) — Iqra University, Islamabad

2022 – 2026

Intermediate, Science — Alpine Degree College, Khanpur

2019 – 2021

Matriculation, Science — Central Public School, Khanpur

2016 – 2018

CERTIFICATIONS

Data Engineering Professional Certificate — Snowflake

- Intro to Snowflake for Devs, Data Scientists, Data Engineers
- Introduction to Modern Data Engineering with Snowflake
- Advanced Data Engineering with Snowflake

Building KPIs for Data-Driven Strategy — LinkedIn

SAP ERP Essential Training — LinkedIn
