

REHAN RASHID

MARKETING & ADVERTISING DATA ANALYST | PERFORMANCE ANALYTICS | BI

Dubai, UAE | +971 50 280 1914 | rehanrashidd1@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

Marketing and performance analytics professional with hands-on experience turning campaign, lead, audience, and business data into actionable insights. Strong in SQL, Python, Power BI, Tableau, Excel, KPI reporting, campaign measurement, conversion funnels, ROAS/ROI analysis, audience segmentation, channel attribution, and automation. Experienced in integrating marketing and lead sources, cleaning and validating data, and building dashboards that support campaign and business decisions.

CORE SKILLS

Marketing Analytics: Campaign Performance, ROAS, ROI, CPA, CTR, CPC, CPM, Conversion Rate, Conversion Funnels, Audience Segmentation, Channel Attribution, KPI Tracking

BI & Visualization: Power BI, Tableau, Excel, DAX, Pivot Tables, VLOOKUP, Power Query, Databricks Dashboards

Data & SQL: SQL, Python, Pandas, NumPy, Data Cleaning, Data Transformation, ETL, Data Quality

Marketing Data Integration: Meta Ads, Google Ads, Landing Pages, Web Forms, API Integration, Lead Data

Automation: n8n, Python ETL, Automated Reporting, KPI Automation, Workflow Automation

Platforms & Tools: Databricks, Snowflake, SQL Server, PostgreSQL, Google Analytics, Git/GitHub

RELEVANT EXPERIENCE

BI Analyst Intern | JUN 2025 – SEP 2025

Artelligent Investments, Dubai

- Worked on **marketing and performance analytics projects for Artelligent Investments' clients**, analyzing campaign, conversion, revenue and channel-level data.
- Built **Power BI dashboards** for campaign performance, KPI monitoring and management reporting.
- Analyzed advertising metrics including **CTR, CPC, CPM, CPA, ROAS, ROI and Conversion Rate** to identify high-performing channels and campaigns.
- Performed data cleaning, validation and transformation using **Python, Pandas, SQL and Power BI**.
- Delivered actionable insights around **budget allocation, campaign optimization, geographic targeting and channel performance**.
- Automated recurring reporting and data workflows to reduce manual effort and improve reporting turnaround.

Data Analyst Intern | JUN 2023 – SEP 2023

Marea Capital Properties, Dubai

- Integrated lead data from Meta Ads, Google Ads, landing pages, and web forms into a centralized workflow supporting marketing and sales operations.
- Developed Python ETL processes for lead ingestion, validation, deduplication, and transformation, reducing manual processing by 80%.
- Built lead-qualification rules to identify invalid, duplicate, and low-quality leads before routing to sales teams.
- Integrated qualified leads with an automated outbound calling workflow, improving response time by 60%.

SELECTED MARKETING & ANALYTICS PROJECTS

GCC Digital Marketing Campaign Performance Analytics

- Analyzed 100,000 digital marketing campaign records for an electronics business operating across the GCC to evaluate channel, campaign, country, and monthly performance.
- Cleaned and validated the dataset using Python, Pandas, and NumPy; handled missing values, checked duplicates, validated data types, and performed logical consistency checks, resulting in 0 missing values and 0 duplicate records.
- Calculated and analyzed key marketing KPIs including CTR, CPC, CPM, CPA, ROAS, Conversion Rate, and Purchase Rate across platforms and campaign types.
- Identified Google Ads as the strongest overall ROAS platform and Meta Ads as the highest conversion-volume platform; Shopping and Search delivered the strongest ROAS, while Lead Generation achieved the highest conversion rate and lowest CPA.
- Built an interactive 3-page Power BI dashboard covering executive KPIs, platform/campaign analysis, and performance trends, and developed recommendations for budget allocation, platform selection, geographic targeting, campaign optimization, and seasonal planning.

Marketing Performance Analytics

- Built an interactive Databricks dashboard tracking marketing ROI, revenue, and conversions across 6+ channels using SQL and UnityCatalog.
- Created conversion-funnel analysis, ROAS-by-channel analysis, and monthly revenue trends using 12 Lakeview visualizations.
- Automated KPI tracking for CPA, ROAS, and channel-level performance to support campaign optimization.

Food Delivery Analytics Platform

- Processed 10,000+ orders across 6 datasets using Databricks and Delta Lake.
- Built 30+ visualizations across executive, customer, and operational analytics with a data-quality framework reporting 99.9% accuracy.

EDUCATION

B.Sc. Software Engineering — Iqra University, Islamabad | 2022–2026
